

**One Day Seminar
on Proposed Revision
of
IS 456:2000
Plain and Reinforced
Concrete
and
IS 1343:2012
Prestressed Concrete
- Codes of Practice**

**Date-
to be Announced
Nehru Science
Centre, Mumbai**

Greetings!

Codes of Practice- IS456:2000 Plain and Reinforced Concrete – and IS1343:2012 Prestressed Concrete are revised comprehensively. To understand and discuss the proposed revisions in the code, SEFI is happy to organize a one-day Seminar in Mumbai on this topic, in association with ISSE. The Seminar will be held in Mumbai on ____ (*Revised Date to be Announced*).

SEFI is inviting to Mumbai three resource persons, who are involved in the drafting of the revised code, to share the philosophy and rationale underpinning the revisions and the proposed major changes in the codes.

This is one of the early curtain raiser events of the proposed revision of the Codes. The Seminar will present both *the conceptual understanding* of material behavior and structural behavior, and *the major implications* of using the proposed revised standard on the state-of-the-practice of design and construction.

Program details of the Seminar are attached. Interested persons may please fill the attached form and remit the registration fee of Rs. 2,000 as given therein. There are limited number of seats to facilitate good interaction between the resource persons and participants, so register at earliest to avoid disappointment.

We look forward to your enthusiastic participation in this special Seminar.
