

STRUCTURAL ENGINEERING FORUM OF INDIA

LIVE WEBINAR

VIRTUAL FELICITATION & TALK

Prof. Dipti Ranjan Sahoo, Department of Civil Engineering, IIT Delhi, has won the **Shanti Swarup Bhatnagar** (SSB) Prize for Science and Technology 2022 in Engineering Sciences. This feat has come after 5 decades long gap for Structural Engineering. Prior to him, Prof. Jai Krishna of the University of Roorkee (regarded as Father of Earthquake Engineering in India) was the last structural engineer to receive this award in 1966! Prof Dipti has been associated with SEFI since his student days and later as an academican and have immensely contributed to SEFI community. This is indeed a matter of immense pride for structural engineering fraternity and an occasion to celebrate his grand success. Join us along with SEFI founders Prof. Sudhir K. Jain and Er. Alpa Sheth to felicitate Prof. Dipti Ranjan Sahoo and explore more about his research.
