EPICONS FRIENDS OF CONCRETE

EFC is glad to announce **Webinar 147**

Pushover Analysis of RCC Buildings

(Demonstration on real life example)

Pushover Analysis is the simplest nonlinear analysis method to demonstrate the expected seismic performance of buildings, designed using any method. This webinar will provide a detailed background, step-by-step methodology and a hands-on example on pushover analysis; and prepare the participants to learn a more sophisticated nonlinear dynamic (time-history) analysis.

Prof. (Dr.) Yogendra Singh

Head, Department of Earthquake Engineering, IIT,Roorkee

Timing- 02.45pm to 04.45pm (Session I)
05.00pm to 06.45pm (Session II)

Scheduled on Saturday, 08 February, 2025 at 02.45pm to 07.00pm on Zoom

Please register here: <https://efc.epicons.co.in/webinar/>

Webinar Co-Ordinator
Hemali Wadekar
9152031321

Registration fees:
Professionals -1000/- | Faculties -750/- | Students - 250/-

Workshop Conveners

Er. Jayant Kulkarni
Er. Anand Kulkarni
Er. Ravindra Deshpande
Er. Arvind Parulekar
